

It Takes a Village

The ACCESSMed Foundation is on a mission to assure affordable, quality medical care for health and income challenged Arizona seniors. Toward that end, we are working to bring together a village of partners.

Taking this village approach is the key to succeeding in our ACCESSMed mission because each village partner has a relationship with a different segment of this large and very diverse population.

Individually, each village partner knows a few dozen, a few hundred, or perhaps a few thousand of these individuals. But, *collectively*, our partners know and work with hundreds of thousands. *Collectively*, we can connect these vulnerable seniors with Medicare, Medicaid and Medicare Advantage benefits that can be life saving and life changing.

Become a Village Partner

If your nonprofit, government agency or for-profit business is involved with health and income challenged seniors, we invite you to join us as a village partner. Joining is simple. Just call or write and let us know that you want to help. We will help you help your elderly customers, clients and beneficiaries access the quality health care they are entitled to and deserve.

We will partner with you in a very simple process for providing Medicare, AHCCCS Medicaid and special needs counseling and enrollment support.

Give The Gift of Quality Health Care

As a partner in the ACCESSMed village, you and your organization will have an opportunity to provide life-challenged seniors with a gift that is priceless . . . particularly during this COVID-19 pandemic.
